OVERVIEW

Keyframe will design, code, and launch a custom English static website for Trustegic, replacing WordPress with a fast, secure codebase. Updates are handled directly via clean code rather than a custom CMS.

To build a strong long-term partnership, our partnership offer includes **12 full months of complimentary technical maintenance and hosting support** (a USD 5,400 value included at USD 0), alongside a discounted development package of **USD 2,700**. Active AEO/GEO growth optimization remains available as an optional add-on whenever your team is ready.

CORE DELIVERABLES & SCOPE

- **English custom website:** full EN design across all corporate pages
- **Static Architecture:** fast, secure, and maintained directly via code files
- **Analytics & Tracking:** GA4, Google Search Console, and GTM integration
- **Hosting Environment:** managed deploys, SSL, backups, & security on client-owned hosting
- **Form integration:** custom handlers for Contact, Submit RFP, and Join Us (Careers)
- **Technical SEO setup:** auto XML sitemaps, robots.txt, canonicals, 301s, & schema markup
- **Full Code & IP Handover:** 100% ownership of source code, design, content, & assets
- **1-Year Support Included:** 12 months technical maintenance, hosting support, & bug fixes

PERFORMANCE BENCHMARK & GOOGLE AUDIT

An empirical audit via Google PageSpeed Insights highlights why a custom codebase is critical to replacing Trustegic's existing WordPress setup:

TRUSTEGIC (CURRENT WP SITE)				KEYFRAME STANDARD (CUSTOM CODE)			
34	58	85	1/3	99	99	100	3/3
MOBILE PERF	DESKTOP PERF	SEO	AI READINESS	PERF SCORE	ACCESSIBILITY	SEO SCORE	AI READINESS

SCOPE ALIGNMENT & KEY TECHNICAL ANSWERS

Hosting Management: Keyframe manages your hosting environment, including code deployments, SSL renewals, server updates, and uptime monitoring. You maintain 100% ownership and control of the hosting account credentials.

1-Year Complimentary Support: For the first 12 months, ongoing technical support (deploys, server updates, SSL renewal, backups, and platform bug fixes) is fully included at USD 0.

Backend Architecture & Data Layer: We build a clean static architecture sized to serve your English pages and forms quickly. This avoids unnecessary database complexity and security risk while keeping the site fast and simple to maintain directly via code.

AEO & GEO (AI SEARCH OPTIMIZATION)

A growing share of search discovery happens directly inside AI engines such as **Google AI Overviews, ChatGPT, Perplexity, and Gemini**. Our optional growth retainer (\$450/mo) adds continuous **Answer Engine Optimization (AEO)** and **Generative Engine Optimization (GEO)**, adding structured data so Trustegic is cited directly as the primary source in AI search answers.
